

Yac Instant Messenger

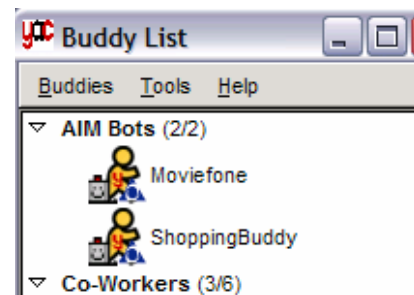

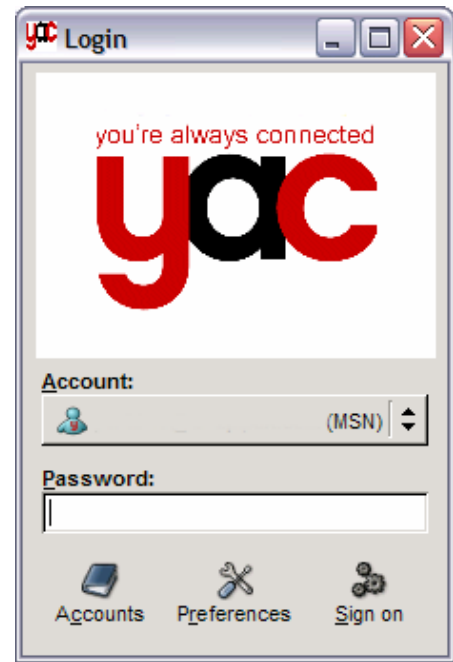

Yac Instant messenger enables real-time chat between you and your colleagues or friends. Use it with your AOL, MSN or Yahoo account.

Who uses Yac ?

Start-Ups, large businesses, solicitors, remote and mobile workers, restaurants, internet users... the list is endless! A myriad of business and personal users all over the UK find Yac solutions invaluable.

Yac Instant Messenger Features and Benefits

- Support AOL, MSN and Yahoo simultaneously – you no longer need 3 message clients and you keep all your existing buddy lists!
- IM can help cut through desktop clutter, resulting in immediate responses. For time-sensitive business processes, such as customer service, crisis management and problem resolution, IM is key.
- IM can provide a link among dispersed workgroups. Remote workers are made more productive by the ability to quickly add other team members to the workgroup.
- IM is a vehicle for rapidly disseminating critical information to the entire company, groups or individuals in cases of emergencies, health issues, network outages or schedule changes.
- Save money – use IM instead of as a substitute for short-duration phone calls, eliminating expenses.
